

TOLGA ÜNAL

Web Application Developer

Toronto, ON, Canada | tolga.unal.dev@gmail.com | +1 (647) 555 0146

PROFILE

Product-minded developer working in the React ecosystem, building a shared language between design and engineering teams. Comfortable owning a feature from discovery through to production deployment.

TECHNICAL SKILLS

Languages	JavaScript (ES2023), TypeScript, HTML5, CSS3, SQL
Frameworks	React, React Router, Vite, Node.js, Express
Tooling	Git, GitHub Actions, Storybook, ESLint, Figma
Cloud	Vercel, Netlify, Render, PostgreSQL, Firebase

EXPERIENCE

Independent Product Engineer 2026 - Present

Build end-to-end web applications for startups and small teams, from discovery to deployment.

Product Technology Intern Summer 2024

Modularized React components and contributed to a design system at a Toronto-based SaaS startup.

EDUCATION

Centennial College 2024 - 2026

Web Application Development. Focus on modern JavaScript frameworks and cloud architectures.

SELECTED PROJECTS

Portfolio Design System (March 2026)

Reusable React component library and theming workflow for multi-industry agencies.

Analytics Dashboard (December 2025)

Real-time analytics platform with KPI tracking and collaboration tools.

Travel Planning App (May 2025)

Mobile-friendly web app for building trip itineraries in a single collaborative view.
